

# CD-Rom Workshops

## Earn CEHs by CD-Rom

You can earn continuing education hours through home study of casat's CD-Rom version of online workshops. Agencies or groups may purchase a CD-Rom and have more than one person earn continuing education hours with the same CD-Rom. The purchase of a CD-Rom includes one certificate (8 continuing education hours). If the agency or group wants additional people to earn continuing education hours with the CD-Rom, an additional \$20.00 fee is required per person.

## How it works

The CD-Rom is set up to allow individuals to complete all reading and writing assignments at their own pace. Reading and writing assignments usually require eight hours of work. Individuals will need access to a computer with Windows 95, 98, ME or XP, a CD-Rom drive, and Internet access to complete these workshops. Eight cehs are available for each CD-Rom workshop.

## Cost

Purchase disk (with one certificate)	\$50.00/disk
Purchase disk (no certificate)	\$30.00/disk
Add'l certificate only	\$20.00/each

Payment of the nonrefundable fee is required before the CD-Rom is mailed. No discounts or scholarships are available.

## Computer Skills Required

Participants need to have basic computer skills regarding using a CD-Rom, printing materials from the disk, using the Internet, etc. Technical assistance in Internet use or the CD-Rom drive is not available from casat staff.

- ◆ Follow the directions for installing the CD-Rom.
- ◆ Take the pre-test and print it.
- ◆ Follow the directions for visiting websites.
- ◆ Complete reading assignments.
- ◆ Complete the writing assignments and print them.
- ◆ Take the post-test and print it.

# Coursework Instructions

- ◆ Submit pre- and post-tests and writing assignments by mail to casat at UNR, Mail Stop 279, Reno Nevada, 89557. Do not submit pre/post tests or modules separately. Do not e-mail them to the course instructor.
- ◆ Certificates will be issued when all paperwork has been submitted.

## CD-Roms

---

Using Patient Placement Criteria (ASAM PPC-2R)

CD-Rom

Managed care companies, treatment providers, and program evaluators use patient placement criteria to ensure that clients are placed in the appropriate level of care. This course will examine the patient placement criteria for clients with substance use disorders adopted by the American Society of Addiction Medicine (ASAM). Admission, continued stay, and discharge criteria for adults and adolescents will be reviewed. Case studies will be utilized to help participants in applying the principles of placement criteria.

- ◆ This is an introductory course. No prior background in ASAM PPC-2R is required.

Clinical Supervision

CD-Rom

Supervision of clinical personnel has been called “meta-therapy” by some practitioners. Effective clinical supervisors are well-trained in psychotherapy, management, and supervision techniques specific to counselors. Many individuals in the counseling field are promoted to clinical supervision with little formal training in clinical supervision.

This course will provide an overview of clinical supervision theories and skills. Additionally, clinical supervision of addiction counselors will be highlighted. This course provides an excellent review for “seasoned” clinical super-

(cont.)  
CD-Rom

visors as well as providing neophyte clinical supervisors with a solid foundation.

- ◆ This course can be applied to the ten hour training requirement for clinical supervisors (see page 27).

Evidence-Based  
Treatment  
Approaches  
CD-Rom

NIDA's publication, Principles of Drug Addiction Treatment, forms the basis of this course. Participants will be exposed to research-based addiction treatment approaches for outpatient, short-term residential, and long-term residential programs. Each approach reviewed addresses certain aspects of a drug addiction and its consequences for the individual, family, and society.

Methadone  
Maintenance  
Treatment —  
Facts, Myths, and  
Special Problems  
in this Population  
CD-Rom

This course will give the clinician the opportunity to learn more about the complex disease of opiate addiction and the most widely used treatment in our nation currently – methadone maintenance.

The medical aspects of pharmacotherapy with methadone, methadone maintenance treatment practices, facts, and myths about methadone treatment, and laws/regulations of methadone treatment will be covered. Special topics in this specified treatment will also be discussed including needle exchange programs, hiv/aids, communicable diseases, and criminal justice involvement.

Current websites and literature will also be discussed on the current controversies of methadone treatment and politics.
